### **DETAILED ACTION**

1. Pursuant to MPEP 606.1, the title has been changed to read:

**-- POWER SAVING METHOD AND ARRANGEMENT FOR A RECONFIGURABLE PROCESSOR ARRAY --**

#### ***Drawings***

2. The drawings are objected to because of the poor legibility caused by the block diagram backgrounds of FIG. 3.

3. New corrected drawings are required in this application because the application is in condition for allowance. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

#### ***Allowable Subject Matter***

4. The following is an examiner's statement of reasons for allowance: Applicant's arguments, filed October 31, 2005, with respect to claims 1-15 have been fully considered and are persuasive. The prior art does not teach or suggest gating a row and column mask signal with a clock signal to enable cells in an array of processor cells.

Morton, U.S. Patent 4,907,148, teaches enabling a processor cell in an array of processor cells by providing a row and column mask signal to said processor cell [col. 3, lines 20-51].

Art Unit: 2116

Morton is silent with respect to gating a clock signal with the row and column mask signals to enable clocking of said processor cell.

Holder, U.S. Patent 5,892,729, teaches gating the address for a memory cell with a clock signal for said cell [col. 3, lines 11-29]. Holder is silent with respect to gating a row and column mask signal to enable a processor cell in an array of processor cells.

Albonesi, U.S. Patent 6,205,537, teaches disabling cells in a processor array that are not required to execute an instruction in order to conserve power by means of configuration signals [col. 8, lines 1-18]. Albonesi is silent with respect to gating a row and column mask signal with a clock signal to enable cells in an array of processor cells.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
